

Internal Medicine Appointment Instructions

In preparation for an appointment with Internal Medicine:

Please bring your pet's records (including lab results, x-rays, and medical history) with you or have your referring veterinarian fax the paperwork prior to the appointment. Our fax number is (570)208-8855. Please be sure you and your pet are identified on the paperwork.

For appointments at 10 AM, 11:30 AM, 1 PM and 2:30 PM, please withhold food after midnight the night before. Water and medications are fine to give.

If your pet has diabetes or problems with low blood sugar, please contact our office prior to the appointment for your pre-appointment instructions.

The appointment will take approximately 2 hours depending on what procedures are performed that day.
